Internship Opportunity

The Florida Park Service Mission Statement is to “Provide resource-based recreation while preserving, interpreting and restoring natural and cultural resources.” The Bureau of Natural and Cultural Resources provides leadership, coordination, guidance, technical support, training, and evaluation for natural and cultural resource management activities on Division lands. For cultural resources, focus is on preservation and conservation of archaeological resources, historical structures and ruins, and collections of cultural objects and artifacts; also managing a collection of digitized state park photos, including scanned historic images, and managing the Florida Park Service archives.

The Bureau of Natural and Cultural Resources is seeking undergraduate and/or graduate interns to work with the cultural resources team. Areas of interest include collections and archives, historic preservation, and archaeology. This will be a remote internship but that could change as State guidelines do. Otherwise, the work environment is primarily office-based with occasional travel to state parks in the Tallahassee region during normal working hours. Applicants will be required to undergo a short interview and register as a State Park volunteer to track hours. We are seeking funding but cannot guarantee any at this time. However, we are happy to meet university requirements for course credit. Interested applicants should submit a resume with a letter of interest stating which area(s) you would like to work in, and availability to Haylee Glasel at Haylee.Glasel@FloridaDEP.gov. The deadline will be December 4, 2020.
